Price	\$81,999.00

Description

How do you haul a support vehicle and race car? Or a car for you and a loved one? The ATC Stacker trailer is the answer to both questions. The 24 FT Quest stacker trailer is a turn key solution to pull behind your motor coach or RV while hauling two vehicles. The ATC stacker starts out with a full perimeter aluminum frame that is precision welded by craftsmen in Indiana. This 24 ft stacker trailer is equipped with three 6k Dexter torsion axles which helps this trailer pull like a dream.

Inside of the Quest 24 ft stacker features an aluminum stinger tilt lift that is rated to hold 6000 lbs. On the ground, there is capacity to haul another full size vehicle while the lift is in the up position. The premium escape door swings up to make loading of cars easier by freeing up space along the driver side. The interior of the 24 ft stacker is laid out like any enthusiast would want their garage to be cabinets, stainless steel work bench, rubber coin floor and high out put LED lights.

The exterior of the ATC stacker has high end features like stainless steel verticals, cast corners, .050 aluminum skin, aluminum mag wheels, and LED lights.
