Description

A PJ 14 ft low pro dump trailer is a heavy-duty trailer designed for hauling and dumping materials such as dirt, gravel, sand, and more. These trailers are perfect for contractors, landscapers, and farmers who need a reliable and efficient way to transport and dump materials.

The 14 ft length of this trailer allows for a large load capacity, while the low pro design allows for easy loading and unloading. The trailer features a hydraulic lift system, which allows you to easily raise and lower the bed to dump materials at the job site. The trailer also has multiple tie-down points to keep your load secure during transport. There are many uses for a dump trailer, including hauling and dumping materials for construction and landscaping projects, transporting and dumping debris from a clean-up job, and hauling and dumping livestock feed.

When it comes to financing a dump trailer versus renting one, it often makes sense to finance if you'll be using the trailer frequently. Owning your own dump trailer allows you to have the equipment on hand whenever you need it, rather than having to rent and schedule a trailer each time you have a project. Plus, financing a dump trailer can often be more cost-effective in the long run, as you'll be able to write off the cost of the trailer as a business expense.

If you're a contractor or landscaper in Columbus, Ohio, and you're in need of a reliable and efficient way to transport and dump materials, consider investing in a PJ 14 ft low pro dump trailer.
