Description

A 20 ft PJ channel frame tilt equipment trailer is a versatile and durable trailer designed to transport heavy equipment and machinery. These trailers feature a channel frame construction, which provides a strong and stable base for carrying heavy loads. The tilt feature allows for easy loading and unloading of equipment, as well as the ability to easily access the trailer bed from the side.

With a 20 ft PJ channel frame tilt equipment trailer, you can transport a wide range of equipment and machinery, including tractors, bulldozers, excavators, and more. The trailer's low-profile design and multiple tie-down points ensure that your equipment stays secure and stable during transport.

At 20 ft in length, this trailer offers plenty of space to transport even larger pieces of equipment. Whether you're a contractor, farmer, or heavy equipment operator, a PJ channel frame tilt equipment trailer is a reliable and efficient way to transport your equipment from one job site to another. So if you need to move heavy machinery and equipment, consider investing in a 20 ft PJ channel frame tilt equipment trailer.
